RULES OF PRONUNCIATION

FOR

GREEK AND LATIN PROPER NAMES.

The following Rules are copied from Worcester, which were by him condensed from Walker's extensive notes and remarks on the accent and pronunciation of Greek and Latin names. They may be of use in determining the pronunciation of classic names and other words not found in the following list.

RULE 1.—The consonants *c, s, t, and x*, before *ia, ie, ii, io, iu, eu,* and *yo*, preceded by the accent, in Latin and Greek words, as in English, commonly take the sound of *j*, as in the following words: *Portia*, (Pór-fi-a,) *Alexia*, (A-lék-fi-a,) *Clytie*, (Klíf-i-ε,) *Helvetii*, (Hel-vé-fi-j,) *Phocion*, (Fó-fi-on,) *Accius*, (Ak'fi-us,) *Caduceus*, (Ka-dú-fε-us,) *Sicyon*, (Síf-i-on.)—When *s*, preceded by the accent, is followed by *ia*, or *io*, it takes the sound of *z*; as, *Mæsia*, (Mé-zi-a,) *Hesiod*, (Hé-zi-od.)—According to Walker, the words *Asia*, *Sosia*, and *Theodosia*, are the only exceptions.

RULE 2.—In some proper names *t* preserves its true sound; as, *Ætion*, *Amphictyon*, *Androtion*, *Enrytion*, *Gratton*, *Harpocraton*, *Hippotion*, *Iphition*, *Metion*, *Ornytion*, *Pallanton*, *Philistion*, *Polytion*, *Sotion*, *Stratton*, and a few others; but *Nephæstion* and *Theodotion* are anglicized, the last syllables being pronounced like the last syllables in *question* and *commotion*. In the words *Æsion*, *Dionysion*, and *Iasion*, the *s* takes the sound of *z*, but not of *g*.

RULE 3.—In words ending in *eia, eii, eium,* and *eius*, with the accent on the *e*, the *i* following the accent is to be understood as articulating the following vowel, like *y* consonant; as, *Elegeia*, (El-ε-jé-ya,) *Pompeii*, (Pom-pé-yi,) *Pompeium*, (Pom-pé-yum,) *Pompeius*, (Pom-pé-yus.) The same rule also applies to words ending in *ia*, preceded by a *u* or *o* having the accent upon it, as *Achaia*, (A-ká-ya,) *Latonia*, (La-tó-ya,) and likewise to words having the accent on a vowel, followed by *ia*, though they may not end the word, as *Pleiades*, (Plé-ya-dez.)

Note.—In the different editions of Walker's Key, there is an inconsistency with regard to the class of words ending in *eia, eii, eium,* and *eius*. In some of them the accent is placed on the *e*, as in *Apuléius*; while others have it placed on the *i*, as *Pompeius*; and, in some cases, the same word is differently accented in the Initial and Terminational Vocabularies; but, in his notes on the terminations *eia* and *eius*, in the Terminational Vocabulary, Walker decides in favor of placing the accent on the *e*, including the whole list "under the same general rule, that of sounding the *e* separately, and the *i* like *y* consonant." In this Vocabulary, all the words of this class have the accent placed upon the *e*.

RULE 4.—The diphthongs *æ* and *œ*, ending a syllable with the accent on it, are pronounced like long *e*, as in *Cæsar*, (Sé-zar;) but, when followed by a consonant in the same syllable, like short *e*, as in *Dædalus*, (Déd-a-lus.)

RULE 5.—In Greek and Latin words, which begin with uncombinable consonants the first letter is silent: thus *C* in *Cneus* and *Ctesiphon*, *M* in *Mneus*, *P* in *Psyche* and *Ptolemy*, *Ph* in *Phthia*, and *T* in *Tmolus*, are not sounded.
